

Carlos Coloma Martínez

Design System Manager & UI Lead

✉ carlos1990627@gmail.com ☎ +51 951 791 191 📍 Lima, Perú

About me

Design System Manager and UI Lead with 6+ years in digital product design, specialized in token architecture, governance, and design system scaling. I lead the evolution of Yanbal's corporate design system, cutting handoff and development time by 30–40% through tokenization and reusable libraries. I pair product judgment with technical fluency (Token Studio, pipelines, Storybook, Stencil.JS) to bridge the gap between design and engineering.

Experience

Design System Manager & UI Lead, Yanbal Internacional 08/2025 – Present | Lima, Perú

Lead the evolution of the corporate Design System, establishing the single source of truth for product, design, and engineering across a multi-country operation.

- Architected the tokenization strategy, shipping the second NPM package with 37 tokenized components ready for development consumption.
- Reduced handoff and development time by 30–40% by eliminating the practice of building a separate component library for each project before implementation.
- Solved component inconsistency in production by establishing a governed, semantically versioned shared library.
- Defined the adoption, contribution, and governance models that regulate the system's lifecycle. Coordinate a cross-functional team of 10 (3 external UI vendors, 3 UX/UI designers, 2 Product Designers, and 2 interns) within a flat organizational structure.

Product Designer / Diseñador UX-UI, Yanbal Internacional 01/2020 – 07/2025 | Lima, Perú

Translated research findings into detailed development specs, ensuring alignment with strategic business goals.

- Nueva MAYA (commercial platform for the sales force): owned the end-to-end process —discovery, ideation, design, handoff, and evolution—. Raised adoption to 95% among Directors and 39% among Consultants, surpassing the previous version (80% and 25–32% respectively) at the corporate level.
- New Onboarding & Credit (redesign of the consultant enrollment flow): led field research with 20+ Directors and 30 Consultants across Colombia and Peru; validated hypotheses through a pilot in Colombia and redesigned the product, scaling the new experience into regional development.

Diseñador UX/UI 05/2019 – 12/2019 | Lima, Perú

Humantech Innovation & Technology Agency

During my time at Humantech, I led user research and wireframe design, managing the entire process from conceptualization to the creation of low- and high-fidelity prototypes. I was responsible for conducting usability tests, working closely with UI designers and developers to ensure that the design solutions were functional and aligned with user needs and project goals. Additionally, my work focused on continuously iterating prototypes based on testing findings, ensuring a seamless and consistent user experience throughout all phases of product development.

Education

B.A. Graphic Design
UCAL, Universidad de Ciencias y Artes de América Latina

2010 – 2016 | Lima, Perú

Supplementary education

JavaScript Certification, *freeCodeCamp*

2026

UX/UI Design, *The Interaction Design Foundation*

2018 – 2021

Design System Management, *Design System Camp*

2024

UX Design, *Repensar Educativo*

2019

Skills

Design Systems & Governance
Token architecture · Token pipelines · Versioned NPM libraries · Semantic versioning · Adoption, contribution, and governance models · Design Ops

Front-end Development
HTML5, CSS3, Astro, JavaScript, React.js, Stencil.JS, Tailwind, Git & GitHub

Soft Skills
Technical leadership · Cross-functional team coordination · Stakeholder communication · Strategic product thinking

Tools
Figma · Token Studio · Storybook · Notion · Lovable / Figma Make / Claude (proof of concept)

UX/UI
User research · Prototyping · Usability testing · Design-to-development handoff · Atomic Design · Human-Centered Design

Languages

Spanish
Native

English
B2 – professional
